---

## Pain Points Identified

- No specific pain points identified due to lack of evidence

---

## Suggested Sales Approach

**Strategy:**

Focus on TCS's digital transformation services and customized software packages

**Opening Message:**

Hello, I came across TCS's digital transformation services and was impressed by the company's expertise in cloud services, IoT and Digital Engineering, AI and data analytics. I'd like to discuss how these services could benefit your organization.

**Talking Points:**

- TCS's digital transformation services can help companies modernize their operations
- TCS's customized software packages can provide tailored solutions for specific business needs

**Avoid:**

- Assuming TCS only provides IT infrastructure services
- Not highlighting the company's global presence and expertise

**Recommended Timing:**

No specific timing recommended due to lack of recent news and events

---

## Key Contacts Guidance

Target key decision-makers in the IT department, such as CIOs or IT Directors, who are responsible for overseeing digital transformation initiatives and software implementations.

---

## Competitive Context

TCS competes with other large IT service providers, such as Infosys and Wipro, in the Indian IT services market [Source: <https://www.peear.in/research/TCS.pdf>].

---

## Data Gaps

- Recent news and developments about TCS
- CRM history and previous sales interactions with TCS
- Specific pain points and challenges faced by TCS's target market
